The Masonic Cancer Alliance, also known as MCA, is a membership-based organization that brings together cancer research, care, and support professionals to decrease the burden of cancer in the Heartland. The MCA is the outreach network of The University of Kansas Cancer Center, a cancer center designated by the National Cancer Institute. One of only 71 National Cancer Institute-designated cancer centers in the country, KU Cancer Center is the only National Cancer Institute-designated cancer center in the state of Kansas.
12 YEARS OF CANCER PREVENTION, TREATMENT, AND SURVIVORSHIP!

All MCA members have access to second opinion and consultation services with multi-disciplinary cancer experts, outreach programs, patient navigation support, continuing education programs, and much more. Thousands of individuals have been helped through MCA member partnerships on services such as free cancer screenings, health and wellness programs, a nationally-recognized sun safety initiative, and psycho-social oncology services.

Each year, MCA gives members, researchers, public health professionals, and other cancer control advocates the opportunity to network, learn, and share best practices at their annual member meeting. Primary work settings of attendees include medical oncology units, hospital-based clinics, academic research institutions, clinical trial offices, and executive offices. Research advocates from The University of Kansas Cancer Center’s Patient and Investigator Voices Organizing Together (PIVOT) program will be in attendance as well. Don’t miss this opportunity to get your business or organization in front of these professionals and advocates by exhibiting at the meeting on Friday, April 17, 2020!
